Subject Index

aluminum 117
ammonia-nitrogen 101
amphiprotic solvents 327
aprotic solvents 327
ascorbate 143
azophenol derivatives 75

batch and flow injection method 67
4,5-benzopiaselenol 3
biological fluids 183
bromide determination 211
4-bromo-1,2-phenylenediamine 303

cadmium 253
cationic and anionic surfactants determination 57, 67
cationic surfactant determination 45
β-CD 3
chelating reagents 83
chemiluminescence 227
chemometrics 163
Chrome Azurol B 117
Chrome Azurol S 117
chromium determination 227
cobalt determination 227
copper 109, 143
copper(II) and nickel(II) 75
coprecipitation 241
crown ether 261

depth profile analysis 163
3,4-diaminobenzoic acid 303
2,4-diaminophenol dihydrochloride 203
differential pulse anodic stripping voltammetry 137
diphenhydramine 319
dissociated constant 287
dissociation constants 327
distribution equilibrium 83
divalent anionic dyestuffs-quinidine associates 45

extracting solvent 267

flow-injection analysis (FIA) 319
fluorescence probe 3
fluorescent assay 143
fluorocarbon surfactant 37
fluorometry 319
formation of ternary ion associate 45
fuzzy theory 163

gallium 261
glass analysis 227
GLC 219
graphite-furnace atomic absorption spectrometry 253

high speed ion analysis 175
homogeneous liquid-liquid extraction 37
HPLC 293
hydrogen peroxide 143, 235

ICP-AES 191
immobilized reagents 287
inclusion complex 27
indicators 327
indirect AAS 183
indirect titrimetry 211
indium 253
indothymol 101
inductively coupled plasma 277
iodide 277
ion-associates 109
ion-association 21
ion chromatography 175, 227
ion-pair extraction 267
isotope dilution mass spectrometry 127

$KClO_3$ 183
kinetic determination 235
kinetic-spectrophotometric method 203
kinetics of complexation 75
kinetics of reaction 303

liquid-liquid extraction 253, 277
liquid crystals 11

membrane filter 109
metal chelates 83, 91
methyl orange and its analogues 57
micellar solution 83
micellar solution of Triton X-100 75
micelles 91
microscale preconcentration 253
mixed solubilizer 21, 27
mixtures 203
mobility 241
molecular shape 267
molybdenum 203
molybdenum determination 153

nickel 253
nitrite determination 211
nonionic surfactants 57

on-line generation 277
optical fibre 287
organic reagents 91

paprika 293
paprika oleoresin 293
partition constants 75, 91
perchlorate 183
pesticides 219
phenyl iodosoacetate reagent 211
pH-dependent phase separation 37
planar shape 267
poly(oxyethylene) 4-nonylphenyl ether 83
porphyrin 37
positron annihilation 11
preconcentration 191
preconcentration by filter 101
1,3-propanediamine-*N, N'*-diacetic-*N, N'*-di-3-propionic acid 235
1,3-propanediamine-*N, N'*-di-acetic-*N, N'*-di-3-propionic acidethylenediaminetetra-acetic acid mixture 235
propyl orange 67
Pyrocatechol Violet oxidation 235

quercetin 153

reflectometry 287
refractory metals 127
retention index 219

screening 219
sediments 241
selenium 303
separation 261
sequential leaching 241
SIMS 163
sodium alkyl sulfates 11
sodium dodecyl sulfate 91
solid-state spectrophotometry 117
solvent extraction 261
spectrophotometry 21, 57, 101, 153, 303
standard reference materials 191
steel 203
sulfate determination 175
surfactants 3, 109, 153, 287
synergistic enhancement 3
synergistic sensitizing effect 27

tandem on-line separations 277
tellurium 21
thallium 241
thorium 127
tocopherols 293
trace analysis for Cd, Pb, Cu and Zn 137
trace element analysis 191

Triton X-100 67
tungsten 203

ultratrace analysis 253
uranium 127

vegetables 137
VLSI materials 127

water-soluble porphyrins 109
wet digestion 137
